CPS Supervisor Arzelia Smith called back and explained that since mother volunteered to bring pt back to the hospital to be admitted and for mother to not have contact that CPS was not able to file for an emergent hearing for custody, but they are able to file "show cause", which they are in the process, but it will take 2 weeks. Ms. Smith did say that if mother comes to the hospital and wants to see pt or attempts to take her AMA, then pt would be considered in imminent danger and then CPS can legally file right away. CPS has concern that mom will try to come on Saturday because it is pt's birthday. SW asked Ms. Smith if CPS explained the separation to mother and that mother understands that she cannot have any contact with pt while pt is admitted in the hospital. CPS stated that they did have a conversation with mother, but they did not put anything in writing. SW asked if it could be put into writing so TCH can have a copy to upload into pt's chart and could be provided to security. CPS will create a safety plan and have mother sign today. SW asked that there is a time frame in the safety plan for when mother is allowed to call for an update that will be at 1pm-2pm she can call the nurses station.

Security is aware of the situation, SW will provide a copy of the CPS safety plan to security once SW receives it.

Please contact SW with any concerns. If mother comes to the hospital, please contact security and SW. **DO NOT DC WITH MOTHER.**
